## REFERENCE LETTER

I hereby confirm that Imbue Lab sp. z o. o. located at ul. Leszczyńskiego 4 lok. 25, 50-078 Wrocław, Poland, has been cooperating with BitTechnica as a partner in regards to participating and supporting our development processes.

BitTechnica uses a real-time business-level flow and transaction monitoring technology proven in a number of highly demanding trading environments where submillisecond latency is deemed important.

BitTechnica uses cutting-edge techniques including distributed caching, complex event processing, distributed computing - all requiring highly skilled experts.

Imbue Lab has been involved in a variety of work including the analysis, design and implementation. This included building multi-threaded core components, overall product framework and graphical user interfaces. Imbue Lab has also been providing deployment and support services to a number of our international clients some of which are Tier One investment banks.

I would like to note that Imbue Lab has always been acting in a professional manner, very productive and responsive, it had a significant impact on the current shape of our development process. All work has been delivered on schedule and met the requirements.

Considering our successful cooperation and high quality of solutions delivered we can fully recommend Imbue Lab as a trustworthy and reliable software company.

*Marcin Apostol*  
Director
